Personal Profile

Currently completing a Dual Degree in Data Science and Telecommunication Engineering at Universidad Carlos III de Madrid, complemented by international exchange programmes at Purdue University (USA) and the University of Technology Sydney (Australia). Professionally, I am passionate about developing technology that generates a meaningful human impact, with a particular interest in artificial intelligence projects, data strategies, and large-scale solutions. Alongside my final year and a half of university studies, I am seeking internship opportunities where I can apply my technical background, gain practical experience, and contribute to impactful projects alongside my studies.

On a personal level, I am a pragmatic, reliable, and highly organised individual. I possess strong intellectual curiosity and learn quickly, approaching complex problems with a human-centred perspective. My profile is characterised by meticulousness, diligence, and objectivity, allowing me to maintain composure and rely on trusted solutions even in highly emotional situations or high-risk decisions. I perform at my best in work environments that provide structure, clear rules, and defined processes, offering the autonomy to pursue quality and develop robust, long-term solutions rather than navigating unpredictable settings.

Regarding my performance within a team, I strongly believe in structured collaboration and multicultural diversity. My interpersonal skills allow me to bring leadership, initiative, and a strong sense of responsibility to any work group. I contribute to projects by delivering precise technical work, articulating highly clear plans of action before making major decisions, and methodically documenting key milestones. Furthermore, I bring a quality-focused vision to the team, preferring to optimize and improve existing documents or processes to ensure steady progress, thereby adding lasting value and stability to the final outcome of the project.

Professional Experience

- **Hospitality Sector** - Sydney Venues - February to June 2026 (5 months) - Hospitality & Catering Assistant working in fast-paced environments to gain adaptability, deep linguistic immersion, teamwork skills, and responsibility within highly multicultural contexts.
- **Nokia (Spain)** - XRLab - October 2025 to February 2026 (4 months) - Extracurricular Intern evaluating the potential of virtual reality technologies to support individuals with mental disabilities, applying engineering approaches focused on accessibility and social impact.
- **Instituto Torrente Ballester** - Mentorship - 2023 to 2024 (1 year) - Extracurricular Teacher tutoring over 25 students in mathematics and English, improving their academic performance and confidence whilst strengthening my own communication and leadership skills.
- **Freelance** - Small Businesses - 2022 to 2024 (2 years) - Web Developer designing and programming websites, interacting directly with clients to transform their ideas into functional platforms, with a strong focus on visual design and user experience.

Achievements and Other Relevant Information

- **University Contributions (AISC):** Co-founder and web developer of the *Artificial Intelligence Student Collective Madrid*, building its digital infrastructure and promoting technical knowledge sharing amongst university peers.
- **Entrepreneurship with QRsume:** Co-founder and web developer of *QRsume*, a platform born from a university course that evolved into a tool to simplify the creation of CVs and personal websites for students.
- **Machine Learning Milestones:** Practical application of technical knowledge through real-world AI projects, including algorithms for lung cancer detection and the implementation of neural networks to identify fake reviews by analysing a dataset of half a million Amazon entries.
- **International Background:** Transformative exchange experiences in the United States (Purdue) and Australia (Sydney), which have provided immense multicultural adaptability, natural English fluency, and personal growth by stepping out of my comfort zone.
- **Parallel Interests:** Enthusiastic traveller and sports fan, particularly padel, always seeking experiences that present both technical and personal challenges.
